Dean Fenwick -- Best Practices - DOMx Systems

Dean Fenwick has had the privilege of working with the most successful denturist clinics in Canada, USA, UK, and NZ. He is the CEO and founder of Specialized Office Systems Inc which provides the DOMx practice management system for denturists - www.denturistsoftware.com . Dean has taught a 4th year required course for patient record keeping on computers in the denturist practice for the Northern Alberta Institute of Technology (NAIT) 2004-2009. He has lectured across the USA and Canada on various practice management topics and has been helping the denturist clinics achieve their potential for the last 20 years.

This course will discuss how the denturist practice is evolving and the latest adaptations to make the most out of your practice. This course will examine leading business models in the most successful denturist practices across Canada and the USA; -- Marketing techniques; Human Resource Management; Managerial Accounting; Cash Flow Management; Patient Trust and Loyalty will all be looked at and discussed. The course will highlight what denturists in Canada are doing to elevate the profession and achieve individual success and patient care.

Dan Wells

Dan’s education and background is in electronic engineering but for nearly thirty years his passion has been speaking and educating in the fields of regulatory compliance and safety. He has lectured to audiences throughout the United States and in Canada. He presents a refreshing, simplified approach to bureaucracy and the “real world” application of regulations.

Since joining Harris Biomedical in 2000, Dan has become a familiar name to the dental community. He is recognized for his compliance expertise regarding infection control, HIPAA, OSHA, and Centers for Disease Control recommendations. As a professional speaker, Emcee, and bureaucratic problem solver, he has received many awards for his work, including a Presidential Point of Light and Washington State Governor’s Distinguished Citizen Award.
After working in both Denturist Clinics and Dental labs for a number of years, Esther decided this was her future and completed her training in 2007 at VCC. She brings a wealth of enthusiasm to her industry. Between volunteering with the DABC for the past 6 years, she dedicates her free time to expanding her knowledge to her profession. Esther opened her own clinic in 2011, where she and her team practice what they preach. In 2015 and 2016 she traveled to Japan to study under Dr. Jiro Abe and became a trainer for SEMCD.

Do you find that lower dentures are the nemesis in your office? Do you struggle to have an alternative to offer patients that are not candidates for lower implants? Join Esther Schwenning D.D., SEMCD in this informative introductory discourse giving you the insight into the Dr. Abe Suction Impression Technique. This is a new clinical impression system that offers both stability and suction on lower dentures. Define who would be a candidate, and what the contraindications for this procedure would be.

We will discuss the restorative techniques that will give optimum results for your patient. This includes proper clinical record taking, as well as laboratory steps. Also will be discussed is how to maintain proper recall for your patients to provide them with optimal care.

**Dr. Peter Gauger D.D.S.**

Pete Gauger is a Washington State Native. He attended the University Of Washington School Of Dentistry. He completed his surgery residency at University of Washington and Harborview Medical Center. Dr. Gauger has been in a private practice in Olympia, DuPont, and Tacoma as well as maintaining part-time faculty status at UW. He opened his own Oral and Maxillofacial Surgery private practiced in Tacoma, WA in 2014. Professional interests include Bone Grafting and Dental Implants, Office Anesthesia, and Oral Pathology.
